Profile and Bio

Final-year Computer Engineering student at UET Taxila with a strong focus on backend engineering, DevOps, system design, and AI applications. Experienced in building scalable REST APIs, real-time communication systems, and microservices architectures using Python, Django, Fast-API, Docker, Kafka, and AWS. Hands-on experience with CI/CD automation through GitHub Actions, cloud deployment. Currently learning LangChain and LangGraph to build next-generation AI agents and autonomous workflows.

Education

Bachelor of Engineering in Computer Engineering **Aug 2023 - Present**
University of Engineering and Technology Taxila, Pakistan
Currently in 7th Semester with updated CGPA of 3.35

Secondary & Higher Secondary Education **Apr 2017- Oct 2022**
Cadet College Choa Saiden Shah Chakwal, Pakistan
A+ Grade · Computing Club · Football Team · Debating Society · Appointment Holder

Selected Projects

Rukhsat – Smart School Pickup & Queue Management System (June 2026) Project Link: https://admin.tideover.site/

- Built a real-time school dismissal queue and parent-verification platform on a shared FastAPI backend serving two Android apps and an admin web dashboard
- Designed REST and WebSocket APIs against an OpenAPI contract, enabling parallel mobile and web development across a 2-developer team
- Automated deployment to AWS EC2 with GitHub Actions CI/CD workflows on every push
- Stack: Python, FastAPI, WebSockets, Next.js, React Native (Expo), AWS EC2, GitHub Actions

WhatsApp Affiliate Automation Platform (June 2026 – Present) Project Link: https://www.beastaffiliates.com/

- Built a WhatsApp bot that turns any forwarded product link into a per-user tagged affiliate link with click-tracked article pages
- Engineered a link-rewrite engine across 9 Amazon marketplaces and Walmart, resolving short links and JavaScript-rendered pages via a headless-render fallback
- Designed an audit-safe earnings ledger with commission rates, referral rewards, and automated report ingestion with duplicate detection
- Covered the core business logic with 200+ offline unit tests, isolated from network and transport layers
- Stack: Python, FastAPI, SQLAlchemy, PostgreSQL, React, TypeScript, Vite, Node.js (Baileys), AWS EC2, Vercel, Nginx

Personalized LMS System – 1st Runner Up in AI Hackathon, May 2026 Project Link: https://atomcamp.duckdns.org/

- Built an adaptive learning platform that personalizes student paths in real time based on performance data
- Implemented dynamic quiz difficulty adjustment and instructor analytics dashboard
- Stack: Python, FastAPI, React, OpenAI API, PostgreSQL

Built “talentgraph.ai”, talent mapping in Global AI Hackathon, 2026 Project Link: https://skillpath.duckdns.org/

- Built a global skill-mapping platform that clusters talent by niche, location, and market trends
- Integrated AI-based job description parsing to match organizations with relevant talent pools
- Stack: Python, Django, React, OpenAI API, PostgreSQL

Full Stack Health Platform for Luther Health LTD (Mar 2025 – Sep 2025) Project Link: https://luther.health/

- Developed a production-grade health management SaaS for a UK-based doctor with 15+ assessment funnels
- Reduced AI infrastructure costs with an n8n workflow automation layer on AWS. Stack: Python, Django, AWS EC2, n8n, OpenAI GPT-4, React, Stripe, PostgreSQL

Real-Time Asynchronous Chat App Using WebSockets with End-to-End Encryption (Jul 2025 – Sep 2025)
Project Link: https://github.com/Tehman700/Real-Time-Chat-App-2-Way-Communication-WebSockets

- Built a full-stack async chat application with E2E encryption, OTP verification, and offline message handling
- Stack: Python, Django Channels, WebSockets, PostgreSQL, React

Potholes Complaint System (Winning Project) in OOP Course Exhibition (Oct 2024 – Dec 2024)

- Built an Android app using Azure Vision AI to verify pothole photo authenticity before filing complaints. Stack: Java, Spring Boot, Azure Vision AI, PostgreSQL

Work Experience

Backend Software Engineer **Aug 2025 – Present**
Fiverr

- Built and deployed production-grade REST APIs using Python, Django REST Framework, and PostgreSQL, successfully delivering projects for 5+ clients across multiple time zones
- Designing and operating a WhatsApp affiliate automation platform end to end — FastAPI services, a Node.js linked-device bot, and a React dashboard — covering link rewriting, click tracking, and an audit-safe earnings and payouts ledger
- Hardened the messaging tier for production with message dedupe, decryption-retry handling, and adaptive per-chat send pacing, and shipped it on serverless deploys with git-push CI/CD and managed PostgreSQL
- Implemented real-time features using Django Channels and WebSockets, enabling bi-directional communication across 3+ client applications
- Designed and maintained CI/CD pipelines on AWS EC2 with Nginx reverse proxy, cutting manual deployment effort by ~40% and improving release reliability
- Achieved Level 1 Seller status within 2 months, maintaining a 5-star rating across all delivered orders through consistent delivery and systematic debugging

Software Engineering Backend Intern **Jul 2025 – Sep 2025**
Inara Technologies, F11 Markaz, Islamabad, Pakistan

- Architected a full-stack REST API from scratch using Django REST Framework, implementing JWT authentication, role-based access control, and custom exception handling across 10+ modules
- Built a nested commenting system supporting likes, dislikes, and threaded replies with full CRUD operations across 5+ content modules
- Developed real-time two-way communication using WebSockets and Django Channels, enabling live user interaction between clients and server
- Configured GitHub Actions CI/CD pipelines integrated with AWS, automating build and release workflows and reducing manual deployment steps by ~50%

Skills

- **Languages:** Python, Java, JavaScript, Verilog, SQL
- **Frameworks:** Django REST, React, FastAPI, Node.js, Django Channels
- **Cloud & DevOps:** AWS EC2, S3, Nginx, GitHub Actions, Docker
- **Tools:** n8n, Postman, Git, WebSockets
- **Databases:** PostgreSQL, MongoDB

Competitions

1st Runner Up in AI Hackathon at Aurex'26, Bahria H11 · Winner, OOP Course Semester Project among 150 students · **Speed Programming Hackathon at Devsinc**

Certificates

- Claude Code 101
- Software Development with GitHub Copilot
- Postman API Fundamentals Student Expert
- API Testing Learning Path Certificate
- Machine Learning with Python
- Transformers in LLMs
